RE: Solvay Soda Ash Joint Venture Plant Works Boundary

Dear Ken:

Per your request, you will find enclosed drawing 100-AQ-401 "Plant Works Boundary" which depicts the Solvay plant works boundary. As we discussed, you may want to refer to drawing 000-G-202 "Emission Points Plot Plan" to see the locations of the emission point sources, a copy of this drawing is also enclosed. Both drawings show UTM coordinates.

I have also enclosed a copy of the letter dated October 30, 1997 to Bernie Dailey concerning revisions to the air quality permit application. This explains the changes in design of the expansion project and changes to the emission rates of existing sources.

If you have further questions concerning the permit application, please do not hesitate to contact me at (307) 872-6571.

Sincerely,

Dolly A. Potter
Environmental Engineer
